

SEVERN

High-Temperature Water-Source Heat Pump

SEVERN STANDARD FEATURES

- Water-to-Water Heat Pump
- Space Heating & Domestic Hot Water Applications
- Nominal Capacity Ranging from 200 to 600 MBH
- COP Efficiency – up to 4.0
- Low GWP R513A Refrigerant
- Maximum 160°F Leaving Water Temperature
- Supports Single-pass or Multi-pass Piping
- Dual Scroll Compressors
- Modular Configuration up to 12 Modules
- Double Wall Brazed Plate Heat Exchanger (Water Heater Models)
- Small Compact Footprint, Versatile Installations
- CSA C22.2/UL 60335-2-40 Certification Pending
- NSF/ANSI/CAN 372 Low Lead Certification Pending (Water Heater Models)

**Commercial Water Source
Heat Pump Space Heating
& Domestic Hot Water**
